## Call for Submissions, ASEG-PESA Conference Melbourne August 11-14, 2013

---

The Australian Society of Exploration Geophysicists and the Petroleum Exploration Society of Australia are now inviting expressions of interest for papers to be delivered at the next ASEG-PESA Conference and Exhibition, Melbourne, August 11-14, 2013.

As in the case of the very successful Brisbane conference in 2012, this conference will feature a series of keynote talks (30 or 60 minutes), oral presentations (30 minutes including questions) and poster presentations.

The Conference topics are chosen to cover the wide range of applied geophysics in mineral exploration, mine-site studies, petroleum exploration and alternative energy sources, and engineering-environmental applications. Enabling technologies with application to multiple areas of endeavour are especially encouraged. Quality case histories will be welcomed and become part of the permanent online database of geophysical literature.

Our conference theme of “**The Eureka Moment**” captures the ethos of discovery and success which is the driving force behind all our endeavours.

Authors are invited to submit an online expression of interest (by 7 December 2012) before submitting an Extended Abstract (by 15 February 2013).
