

Near Surface Asia Pacific Conference

17–19 JULY 2013 • BEIJING, CHINA

Society of Exploration Geophysicists
The international society of applied geophysics

1st Near Surface Asia Pacific Conference and Exhibition

17–19 July 2013 • Beijing, China

The Society of Exploration Geophysicists and the Chinese Geophysical Society along with co-sponsors The Australian Society of Exploration Geophysicists, the Korean Society of Earth and Exploration Geophysicists and the Society of Exploration Geophysicists, Japan announce the first conference on Near Surface geophysics and related topics to be held in Beijing, China in 17–19 July 2013.

The conference will focus on near surface issues within the Asia Pacific region and will bring new technology and the application of various techniques to advance near surface geophysics in the fields of engineering, construction, hydrogeological, environmental and humanitarian areas.

Technical Program

The event will provide the participants an opportunity to present and discuss the latest scientific results, issues and research within the Asia Pacific region.

Sessions will cover the following topics:

- ▮ Near-Surface Geophysics and Human Activities
- ▮ Shallow Seismology
- ▮ Ground Penetrating Radar
- ▮ Electric, EM, and NMR Methods
- ▮ Engineering Geophysics
- ▮ Mining and Geothermal Exploration
- ▮ Remote Sensing and Lidar Applications
- ▮ Hydrogeophysics
- ▮ Rock and Soil Properties
- ▮ Borehole Geophysics
- ▮ Modeling and Inversion
- ▮ Geophysical Instruments

Exhibition

The exhibition will feature companies displaying the latest in sensing equipment, ground penetrating radar, instruments and service companies.

Cosponsored by:

Australian Society of Exploration Geophysicists
Korean Society of Earth and Exploration Geophysicists
Society of Exploration Geophysicists of Japan
